BREEAM COMMUNITIES

Nová Zbrojovka is one of the four best-planned urban districts in the world. It was the first project in the Czech Republic to receive the prestigious international BREEAM Communities Final Certification, confirming that the entire area is designed with people, long-term quality of life, and environmental responsibility in mind. Sustainability and

the development of the whole area are planned efficiently and exceptionally well for the long term. Energy-efficient buildings, abundant greenery, blue-green infrastructure, smart technologies, diverse architecture, smart use of materials, and high-quality public spaces together create a healthy, practical, and well-functioning place to live.

UP TO 30% CHEAPER OPERATION

The office buildings are designed to be extremely energy efficient, as evidenced by the A level of the PENB (Energy Performance Certificate) rating instead of the standard B level used in the Czech Republic. Together with other technological measures such as energy-saving LED lighting, shading elements, an efficient heat recovery system or special CO₂ monitoring in the rooms, we can achieve a reduction in operating costs of 20–30%.

 REDUCE	• CO₂ emission • Saving operating costs by using modern technologies • Water consumption • Number of cars by supporting sustainable mobility
 RECYCLE	• 350,000 tons of construction material (12,000 trucks, that have never left the area) • Waste air inside the buildings • Communal waste
 REUSE	• 4 existing buildings • Solar energy by FVE installation • Rainwater for public greenery
